

A fiber optic router can be used with a network cable

Overview

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard Internet broadband terminal device —modem, Fiber-optic ONT, or others. That's true as long as the two can connect via a network cable, which is almost. Many people ask the same question: Can you use a fiber optic cable with an RJ45 port?

The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic. However, modern networks often combine both technologies. Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional DSL or cable internet.
