

Bahrain fiber optic cable manufacturer sells at high price

Article Overview

Fiber optic cables in Bahrain are often sold at high prices due to premium brands, imported quality materials, and specialized technical standards.

Factors Contributing to High Prices

1. Premium Brands and Quality: Many suppliers in Bahrain, such as Almoayyed Trading & Contracting (ATC), offer high-performance fiber optic systems from international brands like Datwyler and Excel, which are designed for reliability, scalability, and compliance with global standards. These premium products naturally command higher prices due to their superior materials, engineering, and warranties.

2. Import and Logistics Costs: Bahrain imports most fiber optic cables and related equipment. Costs include shipping, customs duties, and handling, which increase the final price for local buyers. Suppliers like AEDHS.com emphasize duty-paid door-to-door delivery, which adds convenience but also contributes to higher pricing.

3. Specialized Applications: Fiber optic cables are used in high-density data centers, telecommunications, and industrial applications. Products designed for these environments, such as OM3, OM4, and OM5 cables, require precise manufacturing and testing, which increases costs.

4. Limited Local Manufacturing: While Bahrain has reputable cable suppliers like AL AMAD AL BAEED, most fiber optic cables are sourced from international manufacturers. Limited local production reduces competition and keeps prices elevated.
