

Brand Power Distribution Box Series

Article Overview

Power distribution box series are modular, safety-focused solutions designed for efficient electrical power management across residential, commercial, and industrial applications.

Overview of Power Distribution Box Series

Power distribution boxes (PDBs) are essential for safely distributing electrical power to multiple circuits while protecting equipment and personnel from overloads, short circuits, and other electrical faults. Modern series are designed with modular construction, allowing flexible installation, easy maintenance, and upgrades to meet evolving electrical demands (CHINT Global) .

Key Series and Features

-

CHINT Final Distribution Boards: Provide reliable power distribution with circuit breakers, earth leakage protection, and overload safeguards. Suitable for residential, commercial, and industrial settings, they ensure safety and compliance with international standards .

-

PDX and TSPE Series (CEEPower Global): Modular boxes for indoor and outdoor use, constructed from durable plastic or 1.2mm premium steel. They support wall-mounted or flush-mounted installations and are equipped with molded case circuit breakers (MCCBs) for large power consumers. Specialized variants like PDX-D/TSX a...
