

Cambodian LC adapter energy-saving type directly supplied by manufacturer

Article Overview

For Cambodia, energy-saving LC adapters must support 230V/50Hz, fit Type A, C, or G outlets, and ideally be sourced directly from certified manufacturers for safety and efficiency.

Electrical Compatibility in Cambodia

Cambodia operates on a 230V, 50Hz electrical system, and outlets commonly include Type A (two flat pins), Type C (two round pins), and Type G (three rectangular pins) . All modern wall sockets are designed to accept multiple plug types, but travelers or businesses sourcing adapters should ensure compatibility with these standards. Devices labeled 100–240V are dual-voltage and can be used safely with a simple plug adapter, while single-voltage devices (e.g., 110V-only appliances) require a step-down transformer to prevent damage .

Energy-Saving LC Adapters

Energy-saving LC adapters are designed to minimize standby power consumption and improve efficiency when charging or powering devices. Key features to look for include:

- High conversion efficiency ($\geq 85\text{--}90\%$) to reduce energy loss.
- Automatic voltage regulation to handle fluctuations in Cambodian power supply.
- Overload, overvoltage, and short-circuit protection for safety....
