

Can a distribution box be mounted on a 140mm wall

Article Overview

Yes, a distribution box can be mounted on a 140mm wall, provided the wall is structurally sound and the box is compatible with surface-mount installation.

Wall-Mounted Distribution Boxes

Wall-mounted distribution boxes are designed to attach directly to vertical surfaces and are commonly used in residential, commercial, and light industrial settings . They typically feature pre-designed knockout points for cable entry and are sealed on all sides to protect electrical components . The thickness of the wall, such as 140mm, is generally sufficient for secure mounting, especially if the wall is made of concrete, brick, or other solid materials .

Installation Considerations

- **Structural Support:** Ensure the wall can support the weight of the distribution box and its internal components. Use appropriate anchors, screws, or expansion bolts suitable for the wall material .
- **Box Depth:** Many standard wall-mounted boxes, such as the Stalflex MB-300x300x140-W, have a depth of 140mm and are designed for surface mounting over existing infrastructure . This makes them compatible with walls of the same thickness.
- **Accessibility:** Install the box at a convenient height (typically around 1.5 meters) for easy access to breakers and wiring .
- **Cable Management:** Ensure that cable entry points at the top or bottom are acces...
