

Central Asian pigtail production

Overview

Procurement is consolidating: large Chinese and Indian optical cable manufacturers are integrating pigtail production in-house, while mid-tier Asian suppliers increasingly specialize in contract assembly of custom lengths, connector types, and jacket materials. Asia consumes an estimated 55–65% of global optical fiber pigtail volume, driven by the world's largest fiber-to-the-home (FTTH) subscriber base, 5G network densification, and hyperscale data-center expansion across China, India, and Southeast Asia. Single-mode pigtails command approximately 65–75% of. The fiber pigtail is to add an optical fiber connector to one section of the optical cable, and the other end remains intact, to realize the active connection among the equipments and cables in the optical network. The operation is simple, convenient and fast. It is one of the most important passive. The Fiber Pigtails Market was valued at 2.35 (USD Billion) in 2025 and is projected to grow to 5. Our 40,000㎡ factory produces high-quality single mode and multimode OFC pigtail products in standard LC, SC, FC, and ST interfaces, serving data. Founded on September 23, 2009, the original company was established in 2000 as Huatai Plastic Hardware Products Factory.
