

Complete distribution box with leakage protection

Article Overview

A distribution box with full leakage protection integrates RCBO or RCCB devices to safeguard against electrical leakage, overloads, and short circuits, ensuring high safety for residential, commercial, and industrial installations.

Key Features

Leakage Protection: Modern distribution boxes are equipped with RCBO (Residual Current Breaker with Overcurrent protection) or RCCB (Residual Current Circuit Breaker) to detect leakage currents and automatically disconnect power, preventing electric shocks and fire hazards . **Overload and Short-Circuit Protection:** These boxes also include MCBs (Miniature Circuit Breakers) or MCCBs (Molded Case Circuit Breakers) to protect circuits from overcurrent and short circuits, ensuring safe operation . **Material and Durability:** High-quality distribution boxes use flame-retardant, impact-resistant plastics or stainless steel, providing insulation, mechanical strength, and resistance to harsh environments . **IP Rating and Environmental Protection:** For outdoor or wet environments, boxes with IP65/IP66 ratings offer complete protection against dust and water ingress, making them suitable for industrial, commercial, and outdoor installations . **Installation Flexibility:** Options include wall-mounted, surface-mounted, or flush-mounted designs, with modular DIN rail assemblies for easy installation and maintenance . **Current Ratings:** Low-voltage protected boxes typically support currents from 6A up to 250A, with modular designs allowing customization of breakers and protective devices according to load requirements
