

Connecting China Unicom fiber optic cable to router

Article Overview

To connect a China Unicom fiber optic cable to your router, you must first use an Optical Network Terminal (ONT) to convert the fiber signal into an Ethernet signal, then link it to your router's WAN port.

Step-by-Step Connection Guide

1. Gather Required Equipment

- Optical Network Terminal (ONT): Provided by China Unicom, this device converts the fiber optic signal into a standard electrical signal your router can use .
 - Fiber optic cable: Usually a thin yellow cable with SC/APC or SC/UPC connectors .
 - Router: Ensure it has a WAN or Internet port compatible with Ethernet input .
 - Ethernet cable: To connect the ONT to the router .
 - Power adapters: For both the ONT and router.
- #### 2. Connect the Fiber Cable to the ONT
- Locate the fiber wall outlet where China Unicom's line enters your home.
 - Remove protective dust caps from both the fiber cable and the ONT port.
 - Carefully align the connector using the key or tab and insert it until it clicks securely. Handle the fiber by its plastic housing to avoid damage .
- #### 3. Link the ONT to Your Router
- Use an Ethernet cable to connect the ONT's LAN or Ethernet output port to the router's WAN port. The WAN port is often labeled and may be colored differently .
- #### 4. Power On the Devices...
