

Data Center Rack Hosting Pricing

Article Overview

Rack hosting in data centres typically ranges from S\$1,300 per month for a full 42U rack in Singapore, with costs varying based on power, services, and location.

Typical Pricing

- **Full Rack Rental:** Renting a full 42U rack in Singapore can cost around S\$1,300 per month, though prices may vary depending on the data centre and included services such as managed support, security, and cooling .
- **Power-Based Pricing:** Colocation pricing is often calculated per kilowatt (kW) of power. In Singapore, rates range from S\$310 to S\$470 per kW per month, reflecting the high demand and premium infrastructure . Smaller deployments or single racks may cost more per kW due to lack of scale discounts .
- **Metered Power Usage:** Some providers charge for power consumption above the allocated amount, for example, S\$1,000 per month per additional 1 kW .

Factors Affecting Cost

- **Rack Size and Configuration:** Full racks (42U) cost more than partial racks or cabinets.
- **Power Allocation:** Higher power density increases monthly fees.
- **Bandwidth and Connectivity:** Local vs international bandwidth allocation can affect pricing.
- **Managed Services:** Security, monitoring, and technical support may be included or offered as add-ons.
- **Contract Terms:** Month-to-month contracts are available, but longer-term contracts may offer discounts
