

Dimensions of an 8-channel power distribution box

Article Overview

A standard 8-channel waterproof distribution box, such as the HT-8, measures 183 × 170 × 95 mm (L×W×H).

Typical Dimensions

For compact 8-channel distribution boxes used in residential, commercial, or PV applications, the HT-8 waterproof box provides a representative example:

- Length: 183 mm
 - Width: 170 mm
 - Height: 95 mm
 - Layout: Single-row, supporting 8 circuits
 - Material: ABS base with PC transparent cover
 - Protection: IP65, suitable for indoor and outdoor use
- Industrial or specialized units, such as the EP9208-1035 EtherCAT Box, may vary in size depending on connectors and mounting requirements, but they typically maintain a compact form factor to accommodate 8 M12 output sockets . Military or high-current 8-channel units, like the M9538, are often larger due to higher amperage handling, solid-state circuit breakers, and additional telemetry features, and their dimensions are usually defined per customer specifications .

Considerations for Selection...
