

Explosion-proof distribution box diibt4

Article Overview

A DIIBT4 explosion-proof distribution box is designed for hazardous environments, offering T4 temperature classification, IIB gas group protection, and robust construction with optional safety features.

Key Specifications

- **Explosion-Proof Rating:** DIIBT4 indicates the box is suitable for IIB gas group environments, with a maximum surface temperature of 135°C (T4), making it safe for flammable gases and vapors commonly found in chemical plants and industrial facilities .
- **Material Options:** Common housings include die-cast aluminum, stainless steel, iron, or SMC, providing durability and corrosion resistance .
- **Protection Features:** Built-in miniature or molded case circuit breakers, overload, short circuit, and optional leakage and surge protection ensure safe operation .
- **Construction Types:** Panels can be composite or isolated. In composite types, the upper enclosure is explosion-proof while the lower terminal enclosure is increased safety type, allowing flexible installation .
- **Environmental Rating:** Typically rated IP65 or IP66, offering protection against dust and water ingress, suitable for harsh industrial conditions .

Standards and Certification

- **ATEX Certification:** Many DIIBT4 boxes comply with ATEX directives, ensuring compliance with European safety standards for explosive atmospheres .
- **GB3836 Compliance:** Designs follow GB3836.2-2010 for explosion-proof electrical...
