

Explosion-proof power distribution box for surveillance

Article Overview

Explosion-proof power distribution boxes are specially designed enclosures that safely distribute electrical power in hazardous areas while protecting surveillance equipment from sparks, flames, and extreme conditions.

Key Features

Explosion-proof distribution boxes are engineered to operate safely in environments with flammable gases, vapors, or combustible dust. They typically include:

- **Certifications:** ATEX, IECEx, and other international standards for Zone 1 and Zone 2 hazardous areas ensure compliance and safety .
- **Materials:** Commonly made from stainless steel (AISI 304L or 316L), glass-fiber-reinforced polyester (GRP), or aluminium, providing corrosion resistance and durability in harsh environments .
- **Protection Ratings:** IP66 or higher for outdoor use, ensuring dust-tight and water-resistant performance .
- **Temperature Range:** Designed to function in extreme temperatures, often from -40°C to $+70^{\circ}\text{C}$.
- **Customization:** Modular designs allow integration of circuit breakers, motor starters, switches, ammeters, voltmeters, and push buttons tailored to surveillance system requirements .
