

Fiber Optic Cable Laying Quotation Table

Article Overview

Fiber optic cable laying costs vary by deployment method, fiber type, trenching depth, and labor, with typical ranges from \$2.50 to \$8.50 per linear foot for installation.

Typical Cost Components and Ranges

Cost Component	Typical Range (USD)	Notes / Influencing Factors
Fiber Cable	\$1.00 – \$4.00 per foot	Single-mode vs multi-mode, strand count (24-288+), quality of fiber
Conduit / Innerduct	\$0.60 – \$2.20 per foot	HDPE, PVC, or steel; innerducts for multiple fibers; urban vs rural
Trenching / Bore Work	\$2.50 – \$8.50 per foot	Depth (36-60 inches), soil type, rock or groundwater, microtrenching (8-16 inches) reduces disruption but not cost
Aerial Deployment	20-40% less than underground	Labor and equipment savings; requires utility pole access
Labor	\$50 – \$150 per hour	Crew size, skill level, regional labor rates, route complexity
Permits / Right-of-Way	\$500 – \$5,000+ per project	Local regulations, private property, environmental approvals
Splicing / Termination	\$50 – \$200 per splice	Fusion splicing, connectors, testing, and certification
Testing & Certification	\$0.10 – \$0.50 per foot	OTDR testing, end-to-end verification, warranty compliance
Travel / Logistics	Variable	Distance to site, crew mobilization, equipment transport

Key Considerations

- Fiber Type & Strand Count: Higher strand counts (432-1,728) are used for backbone networks and increase material costs but provide future capacity .
- Deployment Method: Underground trenching is more expensive than aerial or microtrenching due to excavation, backfill, and restoration
