

# Fiber optic adapter cable

## Article Overview

Fiber optic cable adapters are devices used to connect two fiber optic cables, enabling signal transmission between different connectors or extending cable length.

### Purpose and Function

Fiber optic adapters, also known as couplers, are designed to precisely align and join two fiber optic connectors to ensure minimal signal loss and maintain optical performance . They are commonly used to extend fiber cables, convert between connector types, or facilitate testing and measurement in networks .

### Common Types of Adapters

- LC-LC, SC-SC, ST-ST, FC-FC: Standard adapters for connecting identical connector types .
- Hybrid Adapters (e.g., SC to LC): Allow connection between different connector types, useful for network upgrades or mixed equipment .
- MPO/MTP Adapters: High-density adapters for multi-fiber connections, often used in data centers to support 12, 16, or 144 fibers in a single interface .
- APC vs. UPC Adapters: APC (Angled Physical Contact) adapters reduce back reflection, while UPC (Ultra Physical Contact) adapters provide low insertion loss for general applications .

### Key Features

- Low Insertion Loss: Ensures minimal signal degradation during connection ....
