

Household 54 Distribution Box

Article Overview

A 54-way distribution box is a robust electrical enclosure designed to house up to 54 circuit breakers, providing organized and safe power distribution for residential or commercial setups.

Overview

A 54-way distribution box is typically used in low-voltage residential or commercial electrical networks to protect and organize multiple circuits. It allows for the installation of up to 54 miniature circuit breakers (MCBs) or other protective devices, ensuring safe and efficient power distribution within a household or small commercial building .

Material and Construction

- **Metal Enclosure:** Many 54-way boxes, such as the Havells 3x18 model, are made from high-impact resistant metal, offering durability and long-lasting performance .
- **Plastic Enclosure:** Some models use high-grade ABS or polycarbonate plastic, which is lightweight, flame-retardant, UV-resistant, and self-extinguishing, suitable for indoor or semi-outdoor installations .

Protection Rating

- **IP54:** Provides protection against dust ingress and water splashes, making it suitable for indoor environments like utility rooms, garages, or kitchens .
- **IP65:** Higher protection against dust and low-pressure water jets, ideal for outdoor...
