

How much does a cable tray cost in a utility tunnel

Article Overview

Cable tray costs in utility tunnels typically range from \$5 to \$50 per meter, depending on material, design, and installation complexity.

Material and Price Range

- Steel trays: Commonly used for general-purpose installations, costing approximately \$5 to \$25 per meter. They offer a balance of strength, durability, and affordability .
- Aluminum trays: Lightweight and corrosion-resistant, ideal for humid or industrial tunnel environments, with prices ranging from \$6 to \$30 per meter .
- Stainless steel trays: Highly durable and corrosion-resistant, suitable for tunnels with harsh conditions or strict hygiene requirements, generally the most expensive option .
- Fiberglass (FRP) trays: Resistant to aggressive environments and fire, costing \$10 to \$50 per meter, often used in tunnels requiring high chemical or fire resistance .

Design and Installation Considerations

- Tray type: Ladder trays are stronger and hold heavier cables but cost more, while perforated or wire mesh trays are lighter and cheaper .
- Supports and brackets: Tunnel installations require anchoring to walls or ceilings using brackets, threaded rods, or modular supports, which add to the total cost .
- Fire and safety compliance: Tunnels often require trays with fire resistance (30-9...
