

How to connect a router to a fiber-to-the-home network

Article Overview

To connect a router to a fiber-to-the-home network, you must first link the fiber optic cable to an Optical Network Terminal (ONT) and then connect the ONT to your router via Ethernet.

Required Equipment

- Optical Network Terminal (ONT): Converts the fiber optic signal into an electrical signal your router can use, usually provided by your ISP .
- Fiber optic cable: Typically single-mode with SC/APC or SC/UPC connectors .
- Ethernet cable: Cat6 or higher recommended for high-speed data transfer .
- Router: Ensure it supports gigabit speeds or higher to fully utilize fiber performance .

Step-by-Step Connection

- Locate the Fiber Wall Outlet: This is where the ISP's fiber line enters your home .
- Connect Fiber Cable to ONT: Remove protective caps from both the fiber cable and ONT port. Align the connector and insert it until it clicks securely . Handle the fiber carefully to avoid damage.
- Power On the ONT: Plug in the ONT and wait for the status lights to stabilize, which may take a few minutes . A solid green power light indicates proper operation.
- Connect ONT to Router: Use an Ethernet cable to link the ONT's LAN/Ethernet port to the router's WAN/Internet port .
- Power On the Router: Wait for the router's indicator lights to confirm a successful...
