

How to connect indoor fiber optic cable for mobile broadband

Article Overview

To connect indoor fiber optic cable for mobile broadband, run the fiber to an ONT, then link the ONT to your router or mobile gateway using an Ethernet cable.

Step 1: Plan the Fiber Path

Determine the final location for your Optical Network Terminal (ONT), ideally near your router or mobile broadband device and a power source. Map the shortest, straightest path from the fiber entry point to the ONT, avoiding sharp bends, high-traffic areas, heat sources, or uninsulated spaces to prevent signal loss and cable damage. Use existing conduits or wall cavities when possible to simplify installation and protect the cable ().

Step 2: Select and Prepare the Fiber Cable

Use single-mode fiber for residential FTTH setups, preferably pre-terminated with SC/APC or LC connectors to avoid field splicing. Pre-terminated cables are ready to plug into the ONT and wall outlet. Handle the cable carefully, avoiding bends smaller than the minimum bend radius (typically 10 times the cable diameter or at least 1.5 inches for indoor patch cables) ().

Step 3: Connect the Fiber to the ONT

Locate the fiber wall outlet where your ISP's fiber enters your home. Plug one end o...
