

Huawei 8-port PoE switch PoE

Article Overview

Huawei 8-port PoE switches provide full PoE support on all ports with a total power budget of 124 W, suitable for small to medium network deployments.

Key Specifications

- **Ports:** The S200-8P4S model features 8 Gigabit Ethernet ports supporting PoE and 4 uplink 1000BASE-X ports for high-speed connectivity, while the S110-8P2ST also offers 8 PoE ports with 2 uplinks .
- **PoE Standards:** Both switches comply with 802.3af (PoE) on all 8 ports or 802.3at (PoE+) on 4 ports, providing flexible power delivery for devices like IP cameras, VoIP phones, and wireless access points .
- **PoE Power Budget:** The built-in power module delivers 124 W total PoE power, ensuring full power allocation across all ports when using 802.3af devices .
- **Cooling and Noise:** The S200-8P4S uses a built-in fan for forced air cooling, which may produce higher noise during startup, while the S110-8P2ST relies on natural heat dissipation and is fanless, making it quieter for office environments .
- **Operating Conditions:** Both switches operate in standard temperature ranges, with adjustments for high-altitude environments. The S200-8P4S supports -5°C to +45°C when using long-distance optical modules, and cannot start below 0°C .

Deployment Scenarios

Huawei 8-port PoE switches are ideal for small office networks, campus edge deployments, and industrial applications. The S200 series is suitable for desktop or rack-mounted setups, while the S5735I-S-V2 series offers industrial-grade options f...
