

Imported stainless steel cable trays

Article Overview

Imported stainless steel cable trays are durable, corrosion-resistant systems available in grades 304 and 316L, suitable for industrial and commercial electrical installations.

Material and Grades

Imported stainless steel cable trays are typically made from AISI 304 or 316L stainless steel, offering high corrosion resistance and durability in harsh environments, including chemical or coastal areas. Grade 316L provides superior resistance to chloride and saltwater exposure compared to 304, making it ideal for outdoor or marine applications .

Types and Designs

Cable trays come in various designs to suit different installation needs:

- Wire mesh trays: Lightweight, ventilated, and easy to cut or bend on-site, ideal for complex routing .
- Perforated trays: Solid base with holes for ventilation and cable support.
- Solid-bottom trays: Provide maximum protection for sensitive cables.
- Channel trays: Single-piece systems for power or control cables .

Compliance and Standards

Imported trays often comply with international standards such as BS EN 61537, NEMA, CENELEC EN 50173-1, and ISO/IEC 11801-1, ensuring quality, safety, and co...
