

Indoor Power Fiber Optic Cable Manufacturers

Article Overview

Riteoptic, Faber, and Corning are leading manufacturers of indoor fiber optic cables designed for safe and efficient building installations.

Key Manufacturers

Riteoptic specializes in indoor fiber optic cables suitable for horizontal wiring and vertical backbone subsystems. Their products feature fireproof protection, small bend radius, and resistance to mechanical stress, making them ideal for complex indoor environments. They offer simplex, figure-8, flat, and multi-core micro cables, with OEM/ODM services to customize cables for specific industry requirements. Faber provides halogen-free, flame-retardant indoor cables for installation in ducts, shafts, and as device connection lines. Their cables are available in simplex, duplex, and multi-fiber configurations (up to 24 fibers) and can be pre-assembled with connectors. Faber cables are designed for risers, floor distributors, and secure transitions from outdoor to indoor networks. Corning manufactures indoor fiber optic cables with flame-retardant jackets suitable for deployment in ducts or cable trays. Their products are widely used in commercial and enterprise buildings where safety and performance are critical.
