

Industrial Wiring Guide and Distribution Box Prices

Article Overview

Wiring an industrial distribution box typically costs between \$6 and \$12 per linear foot for standard wiring, with total installation ranging from \$200 to \$1,000 or more depending on complexity and box type.

Cost Breakdown

Labor Costs: Industrial electricians generally charge \$85 to \$150 per hour for fully burdened labor, depending on experience and location . For complex industrial wiring, a master electrician may be required, which can increase hourly rates to \$100-\$150 per hour . **Materials:** The cost of the distribution box itself varies widely. Plastic indoor boxes are inexpensive (\$10-\$60), while metal or weatherproof industrial boxes can range from \$100 to \$450 or more, especially for NEMA 4X or IP66/IP67 rated enclosures . Additional materials include wiring, connectors, and protective devices, which may add 30-50% markup on material costs . **Wiring Costs:** Standard industrial wiring is typically priced at \$6-\$8 per linear foot, while structured or low-voltage wiring may add \$2 per foot or more . For a medium-sized industrial panel, wiring 50-100 linear feet could cost \$300-\$1,000, depending on complexity and accessibility. **Additional Factors:**

- **Box Size and Complexity:** Larger boxes with more circuits increase labor and material costs.
- **Accessibility:** Hard-to-reach locations or retrofitting existing panels can increase labor hours....
