

Installation and Construction of Cable Trays in Cambodia

Article Overview

Cable tray installation in Cambodia follows international standards, using high-quality materials and certified systems to ensure safety, durability, and efficient cable management.

Overview of Cable Tray Systems

Cable trays are essential components in electrical and MEP (Mechanical, Electrical, Plumbing) systems, used to support, organize, and protect electrical and data cables in commercial, industrial, and infrastructure projects in Cambodia . Common types include ladder trays, perforated trays, wire mesh trays, and channel-type trays, each suited for specific applications such as factories, hospitals, airports, and shopping centers .

Materials and Quality Standards

In Cambodia, cable trays are typically made from galvanized steel, aluminum, or stainless steel, offering corrosion resistance and long-term durability in various climates . Many suppliers provide UL-certified and NEMA-compliant systems, ensuring adherence to international safety and performance standards, which is increasingly required for modern construction projects .
