

KVM Switch Hotkey Settings

Article Overview

KVM switches utilize hotkeys to allow users to switch between connected computers efficiently using keyboard shortcuts.

General Hotkey Functionality

- **Hotkey Mode Activation:** Most KVM switches require you to activate Hotkey Mode by pressing a specific key combination, often involving the Ctrl key or Scroll Lock. For example, pressing Scroll Lock twice may invoke Hotkey Mode .
- **Switching Between PCs:** After activating Hotkey Mode, you can switch to a specific PC by pressing the corresponding port ID (usually a number or letter). For instance, if you want to switch to PC 1, you might press 1 after activating Hotkey Mode .

Specific Hotkey Commands

- **TESmart KVM Switch:**
 - Use Scroll Lock or Right-Ctrl as the hotkey trigger.
 - To switch to PC 1, press Scroll Lock + 1; for PC 2, press Scroll Lock + 2 .
- **AV Access KVM Switch:**
 - Default hotkey is set to Tab. To change it, hold Ctrl, Alt, and Shift, then press [to enable or] to disable hotkey functionality. You can assign a new key (like Caps Lock) for switching .
- **Black Box KVM Switch:**
 - Common commands include Scroll Lock + Arrow Up to select the previous PC and Scroll Lock + Arrow Down for the next PC. You can also toggle autoscan with Scroll...
