

Large Cable Distribution Box

Article Overview

A large cable distribution box is a weatherproof, tamper-resistant enclosure designed for safe and efficient medium- to low-voltage power distribution in outdoor or industrial settings.

Overview

A cable distribution box serves as a central hub for branching and connecting multiple electrical circuits. It is commonly used in outdoor, underground, or industrial power distribution networks to manage and protect electrical connections while ensuring safety and reliability . These boxes are available in various sizes and configurations, from compact units to large cabinets capable of handling multiple circuits and high power loads .

Key Features

- **Weatherproof and Durable:** Most large cable distribution boxes are rated IP65 or higher, providing protection against rain, dust, and harsh environmental conditions .
- **Arc-Proof Design:** Many units include arc-resistant features to reduce the risk of electrical explosions and enhance operator safety .
- **Voltage Ratings:** Designed for medium voltage (up to 10kV) or low-voltage applications, with customizable voltage levels depending on project requirements .
- **Internal Components:** Can include fault interrupters, vacuum switches, fuses, and busbars, either pre-installed or left empty for customer installation .
- **Customization:** Enclosures can be tailored for connector types, voltage levels, and space constraints, ensuring compatibility with specific network needs
