

List of 17-channel power distribution box models

Article Overview

Several manufacturers offer configurable power distribution boxes that can support 17 channels, including ABB MNS®, Huawei DPD series, TE Connectivity automotive boxes, and Wieland modular distribution solutions.

ABB MNS® Low Voltage Distribution Boards

ABB's MNS® low voltage distribution boards and power cabinets are modular and multipurpose, suitable for wall or floor mounting. While ABB does not list a fixed 17-channel model, their modular design allows customization to meet specific channel requirements, including 17 outputs. These units are robust, with enclosures made of cold-rolled steel or stainless steel, and offer IP54 protection and chemical corrosion resistance, making them suitable for industrial environments .

Huawei DPD Series

The Huawei DPD125-12-24 DC Power Distribution Box is designed for flexible channel configurations. It can convert 6 or 12 DC input lines into 24 output lines, and with copper fittings, the output can be reconfigured. This flexibility allows users to create a 17-channel output configuration by selectively connecting the outputs to meet the required number of channels .
