

Melted Tapered Type Low Noise CE Certification

Article Overview

To sell a Melted Tapered Type Low Noise product in the EU, it must comply with CE marking requirements, relevant safety and EMC directives, and noise emission standards.

CE Marking Overview

CE marking indicates that a product meets EU safety, health, and environmental protection requirements, allowing it to be sold freely within the EU and European Economic Area . The manufacturer is responsible for ensuring compliance, including all components and systems, and must affix the CE mark visibly and legibly . CE marking can be based on self-assessment or require a Notified Body for higher-risk products .

Relevant EU Directives

For a low-noise, tapered electrical or mechanical product, the following directives are typically applicable:

- Low Voltage Directive (LVD): Covers electrical equipment operating between 50–1,000 V AC or 75–1,500 V DC. Ensures user safety under normal use .
- Electromagnetic Compatibility (EMC) Directive: Ensures the product does not interfere with other electrical or electronic devices and operates as intended .
- Noise Directive 2000/14/EG: Regulates sound power levels for outdoor machinery...
