

North Africa Mesh Cable Tray Installation Price

Article Overview

Wire mesh cable trays in North Africa typically range from \$20 to \$60 per 3-meter section, depending on material, coating, and load capacity.

Overview of Mesh Cable Trays

Wire mesh cable trays are lightweight, open-grid systems designed for routing and supporting power, data, and communication cables. They are commonly made from welded steel or aluminum and feature grid-like apertures (e.g., 50 x 50 mm or 100 x 50 mm) that provide excellent ventilation, easy access, and flexibility for complex wiring layouts. These trays are suitable for industrial, commercial, and residential installations.

Material and Coating Options

- **Steel Wire Mesh:** Often hot-dip galvanized (HDG) for corrosion resistance, meeting standards like SANS 121:2001 / ISO 1461:2009.
- **Electro Zinc Coating:** Provides moderate corrosion protection and is commonly used for indoor applications.
- **Aluminum Mesh:** Lightweight and corrosion-resistant, ideal for humid or coastal environments.
