

North Africa Optical Cable Spinning Plant

Overview

The new facility, the largest of its kind in Africa, is designed to produce up to 9 million kilometres of fibre-optic cable annually, supporting Nigeria's goal of building a self-reliant digital infrastructure network. YOA Cable, Africa's largest optical fibre cable manufacturer, is known for delivering world-class optical fibre products and exceptional customer service. We anticipate market needs, innovate and constantly refine our manufacturing processes and products to deliver faster speeds and more flexible. This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. Coleman Technical Industries chairman Asiwaju Solomon Onafowokan has launched a massive fibre-optic cable factory in Sagamu, boosting Nigeria's digital-economy capacity and reducing dependence on imported network infrastructure. The Nexans Group currently has five sites in Morocco.
