

Optical Module GLC

Overview

The GLC-LH-SMD is a Cisco Small Form-factor Pluggable (SFP) optical transceiver module designed for Gigabit Ethernet communication over fiber optic cabling. A standard 1000BASE-SX or 1000BASE-LX SFP cannot simply be configured to run at 100 Mbps because its optical PHY is fixed at 1 Gbps. This module supports the 1000BASE-LX/LH standard, making it suitable for backbone connections, inter-building links, and. Cisco GLC-LH-SMD compatible SFP transceiver supports up to 10km link lengths over LC duplex SMF fibre. Featuring low power consumption, this industrial. Among Cisco's widely adopted fiber modules, Cisco GLC-LH-SMD has become a popular choice for 1G optical networking deployments.
