

Power Connection Method for EIS215 Series Unmanaged Industrial Switches

Overview

This series provide 6 products to choose from and support 100M Ethernet copper ports and fiber ports, as well as two power supply schemes, 12~48VDC and 100~240VAC/DC. They adopt DIN-Rail mounting to meet the requirements of different application scenes. 3x standard, can provide economical solution for your network connection. IP40 grade protection ensures reliable work in terrible environment. LED indicator is helpful to monitor and control the. Page 1 Model I. IES215-P (12~48VDC) (5 100M copper ports, 12~48VDC power supply input) Model II. This device is suitable for industrial automation, power system automation, intelligent transportation and. Erwähnte Firmen- und Produktnamen sind zum Teil eingetragene Warenzeichen der jeweiligen Hersteller. IES215 is a type of unmanaged industrial Ethernet switch with 5 port 10/100Base-T(X) Ethernet.
