

Price list for additional power-converting optical cables

Article Overview

The cost of additional power-converting optical cables ranges from \$0.05 to \$1.50 per meter for the cable itself, with total installed costs potentially reaching \$2,650–\$14,500 depending on length, type, and installation complexity.

Cable Material Costs

Fiber optic cable prices vary widely based on type, fiber count, and construction:

- Indoor simplex/duplex cables: \$0.05–\$0.30 per meter
 - Single-mode outdoor cables: \$0.10–\$0.50 per meter
 - Multimode cables (OM1/OM2/OM3): \$0.10–\$0.60 per meter
 - Armored or aerial/self-supporting cables: \$0.30–\$1.50 per meter, with armored cables adding 20–50% to cost for harsh environments
- Higher fiber counts, specialized jackets (PE, UV-resistant, flame-retardant), and pre-terminated assemblies increase costs. For example, a 288-strand backbone cable can cost up to \$6 per foot, while a simple 1-core drop cable may be \$0.13 per foot.

Installation and Labor Costs

Installation significantly affects total cost. Factors include trenching, splicing, termination, permits, and labor:

- Basic indoor run (1,000 ft): Cable \$0.40/ft, labor \$1.00/ft, permits \$150, accessori...
