

Price of 220 Standard Electrical Box

Article Overview

A standard 220V electrical box typically costs between \$0.50 and \$8 for the box itself, with full installation potentially ranging from a few hundred to over a thousand dollars depending on complexity.

Box Cost

For a basic residential 220V electrical box, prices vary by material, size, and type. Plastic single-gang boxes are on the lower end, around \$0.50 to \$3, while metal boxes or deeper boxes for complex wiring can cost \$5 to \$8 per unit . Specialized boxes, such as weatherproof or tamper-resistant models, may be higher.

Installation Costs

If you include installation, the total cost rises significantly. Installing a 220V outlet or box typically costs \$200 to \$1,000+, depending on factors like distance from the electrical panel, amperage, whether a new circuit is required, and local labor rates . Electricians usually charge \$75-\$125 per hour, and longer runs or panel upgrades increase both labor and material costs.

Online Listings

For example, a GE TLM3220 220V panel box with a main breaker and five additional breakers is available online as an open-box item, reflecting the type of 220V enclosure you might need for a small residential setup . Prices for such panels vary widely based on brand, features, and condition....
