

Price of 45-degree elbow for cable tray fabrication

Article Overview

The price of a 45-degree cable tray elbow typically ranges from around \$1.3 for bulk steel elbows to higher prices for stainless steel or specialized designs.

45-degree cable tray elbows are essential for smooth directional changes in cable routing, maintaining cable integrity and proper bend radii . Prices vary depending on material, size, and supplier. For example, bulk galvanized or stainless steel elbows can cost approximately \$1.3 per piece when purchased in large quantities . Stainless steel elbows, such as the CleanTray 45-Degree Elbow (SS304, 4"x4"), are designed for frequent washdown applications and may be priced higher due to material and finish .

Material Considerations

- Steel elbows: Strong and durable, ideal for heavy-duty industrial and commercial applications .
- Aluminum elbows: Lightweight, corrosion-resistant, suitable for marine, rooftop, or chemical environments .
- FRP (Fiber Reinforced Plastic) elbows: Non-conductive, highly resistant to chemicals and moisture, perfect for extreme environments like wastewater treatment or power substations .

Additional Factors Affecting Price...
