

Price of Arc-shaped Horizontal Elbows for Cable Trays

Article Overview

Arc-shaped horizontal elbows for cable trays typically cost around \$9.85 per unit for aluminum or stainless steel, with bulk purchase options available.

Arc-shaped horizontal elbows are designed to facilitate smooth cable routing, reduce stress on cables, and improve airflow for heat dissipation. They are available in aluminum, steel, and stainless steel, with aluminum being lightweight and corrosion-resistant, making it suitable for coastal or chemical plant environments, while steel offers higher structural strength for heavy-duty applications . Pricing Overview:

- Average unit price: Approximately \$9.85 for aluminum or stainless steel elbows .
 - Bulk purchase: Discounts are available when ordering 5 units or more .
 - Customization: Sizes and specifications can be tailored for industrial needs, including ladder-type or perforated designs .
 - Surface treatment: Options include anodized aluminum, galvanized steel, or powder-coated finishes for corrosion resistance .
- Applications and Benefits:
- Smooth cornering reduces cable breakage and stress concentration .
 - Open design allows visual inspection and maintenance without removing covers .
 - Lightweight aluminum elbows reduce structural load by up to 60% compared to steel .
 - Suitable for tunnels, bridges, chemical plants, and underground installations .
- For precise pricing, especially for large orders or custom specifications, contacting suppliers like KDM Steel or verified Alibaba distributors is recommended, as prices may vary based on material, size, and quantity .
