

Price of Trapezoidal Cable Trays National Standard Thickness

Article Overview

Trapezoidal cable trays with standard thickness typically range from \$15 to \$50 per meter, depending on material, coating, and supplier.

Price Overview

The cost of trapezoidal cable trays varies based on material (steel, aluminum), surface treatment (hot-dip galvanized, pre-galvanized, powder-coated), thickness, and length. For example, hot-dip galvanized steel trays are generally more expensive due to corrosion resistance and durability, while aluminum trays are lighter and may cost slightly more per meter due to material price. Standard lengths are usually 3m or 6m, and thicknesses range from 2mm to 6mm depending on load requirements.

Typical Price Ranges

- Steel, hot-dip galvanized, 3-6m length, standard thickness: approximately \$15-\$35 per meter.
- Aluminum alloy, anodized or coated, standard thickness: approximately \$25-\$50 per meter.
- Wire mesh or perforated trays: slightly lower cost, around \$15-\$30 per meter, depending on size and load capacity.

Factors Affecting Price

- Material Type: Steel is cheaper than aluminum; stainless steel is more expensive....
