

Price of a 270kW distribution box

Article Overview

The cost of a 270kW distribution box typically ranges from \$3,000 to \$10,000 or more, depending on specifications, materials, and additional features.

Cost Factors

The price of a distribution box for a 270kW system depends on several factors:

- **Voltage and Current Ratings:** Higher voltage and amperage capacities increase the cost due to thicker busbars, larger enclosures, and more robust protective devices .
- **Material and Construction:** Weather-resistant or industrial-grade enclosures for outdoor use are more expensive than standard indoor-rated boxes .
- **Safety Features:** Inclusion of MCBs (miniature circuit breakers), SPDs (surge protection devices), and grounding systems adds to the price .
- **Customization:** Special mounting configurations, integration with building management systems, or smart monitoring capabilities can significantly increase costs .
- **Installation and Accessories:** Cabling, connectors, and labor for installation are additional costs that can vary depending on site conditions .

Typical Applications

For a 270kW solar plant, the distribution box serves as the central hub for AC power distribution from inverters to loads. It may include:

- AC and DC junction boxes with overcurrent and overvoltage protection
