

Recommended Communication Towers in Ecuador

Article Overview

Top communication tower providers in Ecuador include SBA Communications, Phoenix Tower International, Sites, and state-owned CNT, offering shared infrastructure and strategic locations for network deployment.

Major Tower Providers

SBA Communications Ecuador is a leading developer and manager of shared communications sites, including towers, poles, rooftops, and distributed antenna systems. They provide high-quality, neutral infrastructure designed for multiple service providers, with long-term lease options and support for traditional and alternative energy solutions to ensure reliable connectivity . Phoenix Tower International (PTI) acquired 1,408 sites from Telefónica in 2019, becoming one of the largest independent tower companies in Ecuador. PTI focuses on passive infrastructure management and network sharing, making it a key option for operators seeking scalable and cost-effective tower solutions . Sites became the largest infrastructure owner in Ecuador after acquiring 2,500 towers from Claro. They specialize in providing shared tower space and supporting rural connectivity projects, often in partnership with major operators like Claro and CNT . State-owned CNT also operates towers and is exploring asset sales to reduce operational costs while investing in network expansion, particularly in underserved rural areas .
