

Recommended Optical Receiver Brands

Article Overview

Top optical receiver brands include Discovery Semiconductors, Coherent Corp., INNOLIGHT, Accelink Technology, Cisco Systems, Lumentum, Sumitomo Electric, and Broadcom.

Leading Brands and Their Strengths

Discovery Semiconductors (US) specializes in optical photodetectors and receivers for digital communication, offering photodiodes, RF and optical receivers, fiber optic modules, and wide-band amplifiers suitable for high-speed data applications . Coherent Corp. (formerly II-VI Incorporated, US) provides a broad range of optical transceivers, including SFP, SFP+, QSFP, and next-generation modules up to 800G, with strong R&D and coherent optics expertise . INNOLIGHT (China) focuses on high-speed optical interconnects for data centers and cloud applications, known for rapid product development and cost-effective high-performance transceivers . Accelink Technology (China) offers a vertically integrated portfolio of optical transceivers for long-haul, metro, and access networks, emphasizing scalable and reliable production . Cisco Systems (US) leverages its Acacia Communications acquisition to provide advanced coherent optics and pluggable modules for telecom and enterprise networks . Lumentum (US) designs high-speed optical modules for 400G and 800G data rates, supporting data center and cloud infrastructure with integrated laser technology . Sumitomo Electric (Japan) delivers optical transceivers for datacom, metro, and long-haul applications, focusing on reliability, energy efficiency, and 5G/6G network support . Broadcom (US) produces optical transceivers compatible with various fiber types and link distances, suitable for flexible deployment in enterprise and telecom networks
