

Router with 8Mbps Fiber Optic Cable

Article Overview

For an 8Mbps fiber optic connection, even budget-friendly Wi-Fi 6 or Wi-Fi 7 routers will provide stable performance and future-proofing.

Key Considerations

Even though 8Mbps is relatively low for fiber, choosing a router with modern standards ensures better coverage, device handling, and security. Look for:

- Wi-Fi Standard: Wi-Fi 6 (802.11ax) or Wi-Fi 7 (802.11be) for improved efficiency and future-proofing .
- Ethernet Ports: At least one Gigabit WAN port to connect to your Optical Network Terminal (ONT) and multiple LAN ports for wired devices .
- Coverage: Ensure the router's range matches your home size; mesh systems are ideal for larger homes .
- Device Support: MU-MIMO and OFDMA features help manage multiple devices simultaneously .

Recommended Routers for 8Mbps Fiber

- TP-Link Archer AX55 (Wi-Fi 6)
- Dual-band, speeds up to 2402 Mbps (5GHz) and 574 Mbps (2.4GHz)
- 1 WAN + 4 LAN ports, OFDMA, Beamforming
- Budget-friendly and reliable for small to mid-sized homes
- GL.iNet GL-MT6000 (Flint 2, Wi-Fi 6)
- Supports GPON fiber setups, 4 Gigabit LAN ports...
