

Senegal Vertical Shaft Cable Tray Prices

Article Overview

Vertical shaft cable trays in Senegal are available in stainless steel and galvanized options, with prices varying based on material, size, and supplier.

Overview of Cable Tray Options in Senegal

In Senegal, vertical shaft cable trays are offered in stainless steel (SS) and galvanized steel variants. SS cable trays are known for their durability, resistance to corrosion, and ability to handle heavy loads, making them suitable for industrial, construction, and infrastructure projects. Galvanized cable trays are also widely used due to their cost-effectiveness and compliance with industry standards, suitable for electrical installations in commercial and industrial settings.

Pricing Factors

The price of vertical shaft cable trays in Senegal depends on several factors:

- **Material:** Stainless steel trays are generally more expensive than galvanized trays due to higher corrosion resistance and longevity.
- **Size and Configuration:** Standard lengths (e.g., 2.4 meters) and ladder-type designs influence cost, while custom sizes or complex configurations may increase the price.
- **Quantity:** Bulk orders often attract lower per-unit prices, especially for CIF (Cost, Insurance, and Freight) shipments.
- **Supplier and Quality:** Established manufacturers like Jeetmull Jaichandlall (SS trays) and Brilltech Engineers (galvanized trays) provide high-quality products that may be priced higher but ensure compliance with industry standards
