

Smart wholesale price of AC to DC power supply

Article Overview

Wholesale AC to DC power supplies typically range from \$20 to \$300 per unit, with an average cost per watt between \$0.10 and \$0.50 depending on specifications and supplier.

Price Overview

High-quality AC to DC power supplies vary significantly in price based on wattage, efficiency, and safety certifications. Standard units for industrial or consumer electronics applications generally cost \$20-\$300 per unit, while the average cost per watt ranges from \$0.10 to \$0.50. Lower-priced options may compromise on efficiency or reliability, so balancing cost with performance is essential.

Factors Affecting Wholesale Pricing

- **Wattage and Output Power:** Higher wattage units (e.g., 3000W) are more expensive than low-power modules (e.g., 15W) due to increased components and thermal management requirements.
- **Efficiency Ratings:** Units with higher efficiency reduce energy loss and heat generation, which can justify a higher price.
- **Certifications and Safety Standards:** Compliance with UL, IEC, EN, and CB standards ensures reliability and is often reflected in the cost.
- **Form Factor and Mounting Type:** Options include PCB mount, open-frame, chassis mount, and DIN-Rail, with specialized configurations affecting price.
- **Supplier and Brand:** Established manufacturers like MORNSUN offer a wide range...
