

Specifications of East African Zinc-Nickel Plated Cable Trays

Article Overview

East African Zinc-Nickel Plated Cable Trays are typically made from high-strength steel with a zinc-nickel coating, offering enhanced corrosion resistance and compliance with international cable tray standards.

Material and Finish

These cable trays are generally fabricated from high-strength carbon steel or low-alloy steel and coated with a zinc-nickel plating to improve corrosion resistance, particularly in harsh or industrial environments. The zinc-nickel layer provides a protective barrier against oxidation and chemical exposure, making it suitable for indoor and outdoor installations where moisture or corrosive agents are present (ASTM B633, ASTM A653) .

Types of Cable Trays

Zinc-nickel plated trays are available in multiple configurations to suit different applications:

- Ladder Type: Ideal for heavy-duty power cables, allows ventilation and heat dissipation.
- Channel Type: Used for light-duty or instrumentation cables, often with solid or ventilated bottoms.
- Solid Bottom Type: Provides maximum protection against dust, debris, and electr...
