

Standard rack fiber optic cabling price

Article Overview

Fiber optic cable prices range from \$0.09 to \$6 per foot depending on type and strand count, while fiber distribution racks typically cost from a few hundred to several thousand dollars depending on size and features.

Fiber Optic Cable Pricing

The cost of fiber optic cables varies widely based on fiber type, strand count, and construction. For materials only, prices generally range from \$0.09 to \$1.52 per foot for bulk purchases, or \$1 to \$6 per foot at retail . Key factors affecting pricing include:

- **Fiber Type:** Single-mode fiber is cheaper per foot (\$0.10-\$0.50) than multimode fiber (\$0.30-\$1.00) but requires more expensive equipment .
- **Strand Count:** Higher strand counts increase costs; for example, a 12-strand cable costs around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot .
- **Construction and Rating:** Indoor riser-rated cables are less expensive than plenum-rated cables. Armored cables for harsh environments or direct burial can cost \$0.50-\$5 per foot .
- **Pre-terminated Assemblies:** Factory-terminated patch cables and assemblies are more expensive due to labor and connector types . For large commercial installations with 100-200 network drops, total costs including installation can range from \$15,000 to \$30,000 .
