

Tariff costs increase the cost of 2-core optical fiber cable

Overview

Optical fiber products fall under specific Harmonized System (HS) codes: The 104% tariff means that for every \$100 worth of optical fiber products imported from China, the tariff adds \$104 in duties. Therefore, a product that costs \$100 in China would cost \$204 in. The most immediate effect of U. tariffs on fiber optic components has been increased production and import costs. -based telecom providers and equipment manufacturers rely heavily on components such as fiber optic cables, connectors, transceivers, and amplifiers from Chinese suppliers. -China trade tensions have intensified in the optical fiber sector, with 104% U. 3%, costing households \$3,800 annually, while China's 60% control. On April 2, 2025, President Donald Trump announced a sweeping set of tariffs on imports, affecting a wide range of industries, including wire and cable manufacturing.
