

Unicom fiber optic cable connected to router

Article Overview

A UNICOM fiber optic cable connects to a router via an Optical Network Terminal (ONT), which converts the optical signal into an Ethernet signal for your router.

Required Equipment

- Optical Network Terminal (ONT): Provided by your ISP, this device converts light signals from the fiber into electrical signals compatible with your router ().
- Fiber Optic Cable: Typically single-mode or multi-mode with SC/APC or SC/UPC connectors ().
- Ethernet Cable: Cat6a or higher is recommended to maintain high-speed performance between the ONT and router ().
- Router: Ensure it has a WAN or Internet port capable of handling the Ethernet connection from the ONT ().
- Power Supply: Both the ONT and router require continuous power, ideally with surge protection ().

Step-by-Step Connection

- Locate the Fiber Entry Point: Identify where the UNICOM fiber optic cable enters your home or office ().
- Connect Fiber to ONT: Remove protective caps from both the fiber cable and the ONT port. Align the connector carefully and insert until it clicks securely. Handle the fiber by its plastic housing to avoid damage ().
- Power ON the ONT: Plug in the ONT and wait for it to boot and register with the IS...
