

Western Europe Cable Tray Customization Price Inquiry

Article Overview

Cable tray prices in Western Europe vary widely, typically ranging from €20 to €150 per 2.4-meter section depending on material, type, and specifications.

Price Overview

Cable tray costs in Western Europe depend on material, design, and load capacity. Standard hot-dip galvanized steel ladder trays of 2.4 meters length are commonly priced around €20–€50 per section, while stainless steel, aluminum, or specialized corrosion-resistant trays can range from €80 to €150 or more per section. Fittings such as elbows, tees, and junctions are priced per unit, typically €5–€30 each, depending on size and material.

Material and Type Considerations

- Steel (galvanized or stainless): Durable, widely used in industrial and commercial projects; stainless steel is preferred for corrosive environments.
- Aluminum: Lightweight, corrosion-resistant, suitable for outdoor or marine applications.
- Plastic (halogen-free): Used in sensitive environments where fire safety and chemical resistance are critical.
- Tray designs: Ladder trays support heavy power cables; perforated trays allow ventilation; mesh trays are flexible for complex routing
