

What is the price of a 36-circuit distribution box

Article Overview

The unit price of a 36-circuit distribution box typically ranges from \$100 to \$500 per unit, depending on material, features, and order volume.

Price Overview

The cost of a 36-way distribution box varies widely based on several factors:

- **Material:** Metal boxes (steel or aluminum) are more durable and weather-resistant, suitable for industrial or outdoor use, and generally cost more than plastic ABS enclosures used in residential or office settings .
- **Features:** Boxes with MCBs, RCDs, or GFCIs, modular designs, or IP65-IP67 ratings for dust and water protection are priced higher due to enhanced safety and functionality .
- **Capacity and Voltage:** Standard 36-circuit boxes support 120/240V or 230/400V with per-circuit currents from 10A to 100A. Higher-rated boxes with three-phase support or heavy-duty busbars increase the cost .
- **Customization and OEM Options:** Custom branding, busbar modifications, or specialized enclosures can raise the unit price, especially for small orders .
- **Order Volume:** Wholesale or bulk purchases reduce the per-unit cost, while single-unit purchases are at the higher end of the range .
