

What types of tools are available for invisible fiber optic cables

Overview

Because the light traveling through fiber is invisible to the human eye, specialized detection tools are mandatory for safety and verification. A VFL is essentially a powerful red laser (650nm) that is injected into the fiber. We offer a wide selection of specialty fiber optic installation tools and equipment from the leading brands to meet the needs of any fiber installation, maintenance and troubleshooting job. Newport is a leading supplier of Optical Fiber Tools and Accessories as a companion to our fiber optics and components products. A contaminated connector, a poorly cleaved fiber, or a sub-par splice can turn a successful installation into a.
