

Xiaomi routers that support direct fiber optic connection

Article Overview

Xiaomi routers like the BE3600 and Be5000 support direct fiber optic connections via a 2.5G WAN port, enabling high-speed internet and seamless smart home integration.

Compatible Xiaomi Routers

- **Xiaomi BE3600:** Equipped with a 2.5-Gigabit WAN port, Wi-Fi 7 support, and a Qualcomm quad-core processor, this router can handle fiber connections up to 2.5 Gbps. It also functions as a smart home hub for Xiaomi IoT devices and supports up to 128 connected devices simultaneously, making it ideal for gaming, 4K/8K streaming, and VR applications .
- **Xiaomi Be5000:** Also compatible with fiber optic internet, the Be5000 supports 2.5 Gbps WAN speeds and integrates with the Xiaomi Mi Home ecosystem. It maintains stable performance under heavy load and does not require additional media converters or switches for fiber connections .

Setting Up a Fiber Optic Connection

- **Optical Network Terminal (ONT):** Most fiber connections require an ONT provided by your ISP, which converts the optical signal into an electrical signal compatible with your router .
- **Connect Fiber to ONT:** Plug the fiber optic cable from the wall outlet into the ONT's designated port.
- **Link ONT to Router:** Use a high-quality Ethernet cable (Cat6a or higher) to connect the ONT's LAN port to the router's 2.5G WAN port
